

The MM-6 is the smaller member of the MM series of mini-subwoofers. It features a 6.5-inch woofer and two 6.5-inch passive radiators with our exclusive Ribbed Elliptical surrounds, which have been designed to increase excursion, eliminate distortion and raise efficiency. Coupled with the proprietary surround ribs that eliminate any surround dimpling, this small subwoofer plays lower, delivering greater output and fidelity than the competition.

With a frequency response down to 42Hz, 800 watts of power and the clean performance of the black anodized aluminum cone woofer and radiators, the MM-6 performs like a much larger subwoofer.

- Smallest Mirage subwoofer
- Powerful deep bass
- Versatile positioning - tuck away under a table or in a corner
- Furniture grade high gloss black finish

## Specifications
