

EASYA

Product specification sheet

Easya is a powered and wireless sound system. It combines all the qualities of a classic high fidelity speaker with the new ways of enjoying music. Easya features a digital amplifier with a wireless receiver that can be linked with the Hub. With Easya, Focal has created a simple-to-use system without the limitations of a separate system. Recommended for rooms measuring from 20m² and for a listening distance of 2.5m.

Ultra rigid MDF board construction, with excellent inertia and neutrality

5" (13cm) Polyglass bass-midrange
Rich midrange, double bass level

CD quality digital wireless receiver
16 bit/44.1kHz
No compression, no loss of audio

Aluminium/Magnesium inverted dome TNV2 tweeter with Poron suspension
Softer sound

5" (13cm) Polyglass woofer
High power handling

Powerful 85W RMS
Digital amplifier

Easya, White High Gloss finish
