SA-32AE (ANNIVERSARY EDITION) **Hybrid Stereo Preamplifier**

In 1996, Vincent launched the SA-31, the first hybrid preamplifier in the PowerLine series. It was a success story, later complemented by the SA-31 MK, and then in 2017 by the more than worthy successor, the SA-32.

To celebrate the 30th anniversary, we are releasing a limited special edition of the SA-32 AE.

Compared to the standard version, not only the slightly modified design is striking, but also the somewhat larger housing. This is due, among other things, to the new features that have been added. The limited AE version is equipped with a comprehensive digital section. In addition to Bluetooth, coaxial and optical inputs, this also includes HDMI for connecting a TV with Audio Return Channel (ARC).

But some changes were also made to the circuitry. The four 6N16 tubes were replaced by two 12AU7 and two ECC88 tubes.

The 12AU7 tubes are used directly after the input in the signal path and provide a warm and captivating sound. The ECC88 tubes then act as phase splitters in the tube-based tone control.

PRODUCT INFORMATION

SA-32AE (ANNIVERSARY EDITION)

Hybrid Stereo Preamplifier

The elaborately designed power supply, equipped with an R-Core transformer and high-end capacitors from Wima and Nichicon, ensures extremely low ripple and exceptional voltage stability. This significantly improves the signal-to-noise ratio, reduces distortion, and increases sonic clarity.
